

Special Issue on
Water Environment and Aquatic Life
Call for Papers

Aquatic life means such type of species like mammal, fish, amphibian, reptile, mollusk, crustacean, arthropod, invertebrate, coral, or other animal that uses surface water as primary habitat for at least a portion of its life cycle. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Water Environment and Aquatic Life.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water Environment and Aquatic Life**. Potential topics include, but are not limited to:

- Algae
- Catfish
- Daphnia
- Frog
- Invertebrates
- Macroinvertebrate
- Mussels
- Salmon
- Turtle
- Fisheries management
- Aquatic biodiversity
- Aquatic life and habitats
- Aquatic mammal
- Aquatic plant
- Aquatic weed and algae control
- Chronic toxicity to aquatic life
- Cold-water aquatic life
- Lake mapping and bathymetry
- Marine biology
- Stormwater pond inspections
- Stream ecosystem
- Water quality testing

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water Environment and Aquatic Life**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 8th, 2022
Publication Date	November 2022
