

Special Issue on
Water Quality Monitoring, Assessment and Management
Call for Papers

Water quality refers to the suitability of water for a particular use based on selected chemical, physical, and biological characteristics. It has a significant impact on water supply and often determines supply options. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Water Quality Monitoring, Assessment and Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water Quality Monitoring, Assessment and Management**. Potential topics include, but are not limited to:

- Biological analysis
- Chemical analysis
- Physical analysis
- Drinking water quality
- Environmental water quality
- Groundwater quality
- Human consumption
- Hydrological measurements
- Industrial and domestic use
- Real-time monitoring
- Saline water and salinity
- Sampling and analytical methods
- Urbanization and water quality
- Wastewater and sewage water
- Water quality monitoring

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water Quality Monitoring, Assessment and Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 28th, 2023
Publication Date	February 2024
