

Special Issue on Water Quality and Health

Call for Papers

Water quality describes the condition of the water, including chemical, physical, and biological characteristics, and is usually about its suitability for a specific purpose, such as drinking or swimming. The quality of water is related to human health. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Water Quality and Health.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Water Quality and Health**. Potential topics include, but are not limited to:

- Biological analysis
- Chemical analysis
- Physical analysis
- Drinking water quality
- Environmental water quality
- Groundwater quality
- Human consumption
- Hydrological measurements
- Real-time monitoring
- Saline water and salinity
- Sampling and analytical methods
- Urbanization and water quality
- Wastewater and sewage water
- Water quality monitoring
- Water contamination and diseases

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Water Quality and Health**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 8th, 2024
Publication Date	April 2024
