

Special Issue on Sustainable Water Use

Call for Papers

Sustainable water use refers to the responsible and efficient management of water resources in a manner that meets the needs of present and future generations, while ensuring the preservation and protection of the natural environment. This involves adopting practices that promote water conservation, reducing water wastage, and optimizing the use of water resources to minimize the impacts of human activities on aquatic ecosystems. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Sustainable Water Use.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Sustainable Water Use**. Potential topics include, but are not limited to:

- Climate change adaptation and water management
- Desalination technologies
- Ecological water consumption
- Flood control and mitigation
- Groundwater management
- Integrated water resources management
- Wastewater management
- Water and disaster risk management
- Water and the green economy
- Water conservation
- Water governance
- Water pollution control
- Water resource management
- Water reuse
- Water security
- Water supply and demand
- Water supply and sanitation
- Water treatment
- Water-energy nexus

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Water Use**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 28th, 2024
Publication Date	July 2024
