

Special Issue on Agricultural and Food Economics

Call for Papers

Agricultural economics studies of the allocation, distribution, and utilization of the resources used, along with the commodities produced, by farming. Agricultural economics plays a role in the economics of development. Food economics is about food commodities trading, globalization and government policy. Food is also a good barometer of globalization; as incomes rise, more food is consumed, compounding the supply-and-demand formula.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Agricultural and Food Economics**. Potential topics include, but are not limited to:

- Food market and marketing
- Food policy and management
- Agriculture, food and consumer economics
- Agriculture, food and trade
- Price analysis
- Cost-effectiveness analysis
- Supply chain management
- Agricultural economics and rural development
- Agriculture/food business management
- Agronomy for sustainable development
- Agriculture and labor issues
- Farm management and economics
- Agribusiness
- Production economics
- Productivity management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Agricultural and Food Economics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 31st, 2021
Publication Date	December 2021
