

Special Issue on Sustainable Recycling of Polymers

Call for Papers

Sustainability, industrial recycling, eco-efficiency, and green chemistry are guiding the development of the new generation of materials, products, and processes. Bio-based polymers and biodegradable plastics based on renewable agricultural and biomass feedstock can form the basis for a portfolio of sustainable, eco-friendly products. The goal of this Special Issue is to provide a platform for scientists worldwide to promote, share, and discuss various new issues and developments in the area of **sustainable recycling of polymers**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **sustainable recycling of polymers**. Potential topics include, but are not limited to:

- Environmental effects on polymeric materials
- Biodegradable polymers
- Sustainable bio-based products
- Green composites
- Plastics recycling
- Polymer recycling and sustainability
- Natural fiber materials and fiber recycling

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Recycling of Polymers**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	November 17th, 2016
Publication Date	January 2017

Guest Editor:

Dr. Sibeles Cestari

Federal University of Rio de Janeiro, Brazil
