

## Special Issue Chemistry of Functional Polymers

### Call for Papers

The research on advanced functional polymers is being driven by the fast-growing demand for new functional materials that can be used in revolutionary technologies. Polymers can be endowed with functions by using certain special preparation methods or by introducing functional groups or fillers into materials. These functions are either intrinsically possessed by materials or actuated by external stimuli. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Chemistry of Functional Polymers**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Chemistry of Functional Polymers**. In this special issue, potential topics include, but are not limited to:

- Chemistry of stimuli-responsive polymers
- Chemistry of elastomers & surfaces
- Functional polymer-on-polymer structures
- Reactive cross-linkable prepolymers
- High-performance thermosetting polymers
- Natural or degradable polymers
- Conducting polymers
- Porous polymers

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Chemistry of Functional Polymers**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 25th, 2021
Publication Date	June 2021
