

## Special Issue on Metallic Materials

### Call for Papers

Metallic Materials research represents a fundamental and vital area within the broader discipline of materials science and engineering. It involves a comprehensive exploration of the properties, behaviors, and applications of metals and metal-based alloys, which constitute a significant class of engineering materials. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Metallic Materials**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Metallic Materials**. In this special issue, potential topics include, but are not limited to:

- Microstructure and Phase Transformations
- Mechanical Behavior and Deformation
- Processing and Fabrication Techniques
- Surface Engineering and Coatings
- Functional Metallic Materials
- Corrosion and Protection

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Metallic Materials**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 15th, 2024
Publication Date	October 2024
