

Special Issue on Sustainable Natural Resources Research and Development

Call for Papers

The rapid growth of human populations, accelerated urbanization and industrialization processes, huge consumption of natural resources, large-scale mining and consumption of massive quantities of fossil-carbon fuels are resulting in smog problems and the broader negative effects of climate change, which are weakening eco-systems globally. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Sustainable Natural Resources Research and Development**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Sustainable Natural Resources Research and Development**. In this special issue, potential topics include, but are not limited to:

- Sustainable natural resource management
- Renewable resources
- Social-ecological systems
- Innovation ecosystems
- Environmental change
- Natural resource management and human health
- Systems methodologies for sustainable natural resources development

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Sustainable Natural Resources Research and Development**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 15th, 2024
Publication Date	November 2024
