

Special Issue on Children Research

Call for Papers

Children Research refers to the scientific study of different aspects of children's lives, which includes their development, education, health, welfare, social and emotional wellbeing, among others. Researchers in this field investigate a range of issues related to children, including their cognitive, emotional, social, and physical development, as well as various environmental factors that affect their lives. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Children Research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Children Research**. In this special issue, potential topics include, but are not limited to:

- Child neurology
- Integrative pediatrics
- Child neurology
- Child development
- Child psychology
- Childhood education
- Children's health and nutrition
- Child welfare and protection
- Children and the family
- Children and the environment
- Child abuse and neglect
- Children and technology
- Children and media
- Children and crime
- Children and poverty
- Children and politics
- Children's rights and participation
- Children and social issues.

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Children Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 27th, 2023
Publication Date	October 2023
