Abstract

Proximity of languages is defined as an application of a special function distance between sets of points. It is discussed the languages of the German group in the text "Universal Declaration of the human Rights", translated from the English original, only as an example.

Keywords

Distance between Languages, Distance between Sets of Points

Subject Areas: Linguistics, Statistics

1. Introduction

This paper is a continuation of our paper [1], where we defined the proximity of the languages of the German group on the base of a text, translated from English to the others languages, using a special function distance between sets of points under some conditions, defined firstly in [2]. In this paper we will apply the same

Definition. Let $A_1 = \{a_1(i_1)\}_{i_1=1}^{n_1}$ and $A_2 = \{a_2(i_2)\}_{i_2=1}^{n_2}$ be two sets of points $a_j(i_j) = (x_j(i_j), y_j(i_j))$, $j = 1, 2$; let φ_j , $j = 1, 2$, be two angles of rotation around the points of Fermat (or Fermat-Torricelli) $F_j(F_jx, F_jy)$, $j = 1, 2$. Then by definition under distance between the sets A_1 and A_2 we understand the number

$$\text{Re } x = \text{Re } x(A_1, A_2) = \frac{1}{n_1 n_2} \min_{\varphi_1, \varphi_2} \left| \sum_{i_1=1}^{n_1} \sum_{i_2=1}^{n_2} \sqrt{(X_2(i_2) - X_1(i_1))^2 + (Y_2(i_2) - Y_1(i_1))^2} - 1 \right|$$

where

$$X_j(i_j) = \frac{1}{p_j} \left((x_j(i_j) - F_jx) \cos \varphi_j - (y_j(i_j) - F_jy) \sin \varphi_j \right), \quad j = 1, 2;$$

$$Y_j(i_j) = \frac{1}{p_j} \left((x_j(i_j) - F_j x) \sin \varphi_j - (y_j(i_j) - F_j y) \cos \varphi_j \right), \quad j = 1, 2;$$

$$p_j = \frac{1}{n_j^2} \sum_{i_1=1}^{n_j} \sum_{i_2=1}^{n_j} \sqrt{(x_j(i_2) - x_j(i_1))^2 + (y_j(i_2) - y_j(i_1))^2}, \quad j = 1, 2.$$

We will apply the computer system Mathematica, in which the formula for Rex looks like:

(1) $\text{Re } x(A_1, A_2) \rightarrow$

`NMinimize[Abs[(1/(n1*n2) {Sum[Sqrt[(a2x[j]-a1x[i])^2+(a2y[j]-a1y[i])^2]/. {a1x[i]→1/p1((x1[i]-F1x)Cos[fi]-(y1[i]-F1y)Sin[fi]), a1y[i]→1/p1((x1[i]-F1x)Sin[fi]+(y1[i]-F1y)Cos[fi]), a2x[j]→1/p2((x2[j]-F2x)Cos[psi]-(y2[j]-F2y)Sin[psi]), a2y[j]→1/p2((x2[j]-F2x)Sin[psi]+(y2[j]-F2y)Cos[psi])}], {i, n1}, {j, n2}]/.<...>-1], {fi, psi}]`

where <...> is the list of the coordinates of all points.

Coordinates of the points of Fermat $F[F_x, F_y]$ we find by the formula:

(2) Point of Fermat $F[F_x, F_y]$ `NMinimize[(1/n)Sum[Sqrt[(F_x-x[i])^2+(F_y-y[i])^2], {i, n}]/.<...>, {F_x, F_y}]` and for the normalizing divisor p – by the formula:

(3) Divisor $p \rightarrow (1/(n*n)) \text{Sum}[\text{Sqrt}[(ax[j]-ax[i])^2+(ay[j]-ay[i])^2] /. \{ax[i] \rightarrow x[i], ay[i] \rightarrow y[i], ax[j] \rightarrow x[j], ay[j] \rightarrow y[j]\} / . \{<...>, \{i, n\}, \{j, n\}\} / N,$

where <...> contains the list of coordinates of the n points of the set with this point of Fermat (Point of Fermat for given set of points is such a point, which sum of distances to all points of the set is minimal).

The object of our research here is the same text “Universal Declaration of the human Rights”, proclaimed by the United Nations General Assembly in Paris on 10 December 1948 and translated at present in 437 translations and can be seen in Internet [3] on Official UN **Universal Declaration of Human Rights** Home Page.

In [3] we studied the translated texts on this Home Page in Slavic languages.

Now we continue the study the corresponding translations in Germanic languages of the two groups: West German Languages with the following 9 representatives (in alphabetical order): Afrikaans, Deutsch (German), English, Frysk (Frisian), Nedelands (Dutch), Niederdeutsche, Pijin, Scots, Yiddish, and North German Languages with 6 translations in Dansk (Danish), Islenska (Icelandic), Føroyskt (Faroese), Norsk (Norwegian) in two forms: Bokmål and Nynorsk, and Svenska (Swedish).

2. Statistics of the Letters in Different Translations of “Universal Declaration of the Human Rights” and the Distances between Languages

2.1. West German Languages

The text in Deutsch “**Allgemeine Erklärung der Menschenrechte**” contains 29 letters (including β) with total absolute frequency 10 025, distributed in increasing range as it follows in numbers and figures:

{1-x-1, 2-y-2, 3-ß-31, 4-ö-34, 5-j-36, 6-p-40, 7-ü-52, 8-ä-56, 9-v-84, 10-w-109, 11-z-117, 12-k-126, 13-b-130, 14-m-163, 15-o-173, 16-f-212, 17-c-323, 18-g-378, 19-l-413, 20-u-461, 21-s-492, 22-h-504, 23-a-530, 24-d-574, 25-t-606, 26-i-765, 27-r-790, 28-n-1069, 29-e-1754}

The letter **x** has the smallest frequency 1, the letter **e**—the greatest frequency of 1754.

Arranged in decreasing order (ranked), the same data forms the following sequence:

De{1754,1069,790,765,606,574,530,504,492,461,413,378,323,212,173,163,130,126,117,109,84,56,52,40,36,34,31,2,1}

Applying the Formulas (2) and (3), we get Point of Fermat {FDex→15., FDey→173.}} and divisor pDe→378.83.

By similar way we get:

In English text “Universal Declaration of the human Rights”:

En{1077,803,714,706,705,699,609,465,446,398,324,292,224,196,189,166,165,152,109,99,75,18,16,15,7,4} FEEn→14.9011, FENy→210.188; pEn→325.326.

In Frysk (Frisian) text “**Universele ferklearring fan de rjochten fan de minske**”:

Fry{1461,1105,736,651,639,632,528,454,390,387,348,309,288,236,228,224,159,154,145,136,131,104,71,61,36,33,29,21,18,10,5,2,2,1,1} with Ffryx→18., Ffryy→154; pfry→327.098.

In Afrikaans text **“UNIVERSELE VERKLARING VAN MENSEREGTE”**:

Afr{1694,776,753,607,568,491,446,442,414,378,373,301,246,181,143,135,113,112,98,77,72,6,2} with FAfrx→12., FAfry→301; pAfr→351.508.

In Nedelands (Dutch) text **“UNIVERSELE VERKLARING VAN DE RECHTEN VAN DE MENS”**:

Ne{2144,1187,764,684,681,645,622,545,390,388,352,324,306,205,178,176,166,152,147,142,100,96,1,1} with FNex→13., FNey→306; pNe→417.932.

In Niederdeutsche (Low German) text **“Allgemeen Verklaren vun de Minschenrechten”**:

UD{1652,1243,903,722,709,561,455,455,454,453,378,285,242,238,214,174,172,168,151,129,120,109,99,16,11,7,3,2} with FUDx→15.5077, FUDy→221.865; pUD→383.368

In Pijin text **“Universol Declarason lo Hiuman Raits”**:

Pi{961,878,709,673,513,495,486,447,394,351,314,184,166,154,153,149,134,123,122,93,67,15,3,1} with FPix→14.2154, FPiy→174.743; pPi→295.649.

In Scots text **“Universal Declaration o Human Richts Inning”**:

Sc{1002,801,779,777,689,549,533,467,429,364,319,304,196,191,136,134,128,127,111,105,56,41,15,11,6} wit FScx→13., FScy→196; pSc→318.109.

In Yiddish text **“Universal deklaratsie fun mentshnrekhht hagdome”**:

Yi{895,821,658,621,546,520,465,398,387,362,338,224,222,210,196,184,166,163,161,155,132,119,116,116,14,72,56,52,26,25,15,12,12,1} with FYix→18.2901, FYiy→163.804; pYi→249.707

Now we are ready to apply Formula (1) for Deutsch and Frysk (for instance), where X-coordinate means the place (the rank) in the sequence of frequencies; Y-coordinate is the value of the frequency:

$$\text{Rex}[\text{Deifry}] \rightarrow \text{NMinimize}[\text{Abs}[(1/(29*35)) \{ \text{Sum}[\text{Sqrt}[(a2x[j]-a1x[i])^2 + (a2y[j]-a1y[i])^2] / \{ a1x[i] \rightarrow 1/pDe((xDe[i]-FDex) \text{Cos}[fi] - (yDe[i]-FDey) \text{Sin}[fi]), a1y[i] \rightarrow 1/pDe((xDe[i]-FDex) \text{Sin}[fi] + (yDe[i]-FDey) \text{Cos}[fi]), a2x[j] \rightarrow 1/pfry((xfry[j]-Ffryx) \text{Cos}[psi] - (yfry[j]-Ffryy) \text{Sin}[psi]), a2y[j] \rightarrow 1/pfry((xfry[j]-Ffryx) \text{Sin}[psi] + (yfry[j]-Ffryy) \text{Cos}[psi]) \}], \{i,29\}, \{j,35\} \} / \{ xDe[1] \rightarrow 1, yDe[1] \rightarrow 1754, xDe[2] \rightarrow 2, yDe[2] \rightarrow 1069, xDe[3] \rightarrow 3, yDe[3] \rightarrow 790, xDe[4] \rightarrow 4, yDe[4] \rightarrow 765, xDe[5] \rightarrow 5, yDe[5] \rightarrow 606, xDe[6] \rightarrow 6, yDe[6] \rightarrow 574, xDe[7] \rightarrow 7, yDe[7] \rightarrow 530, xDe[8] \rightarrow 8, yDe[8] \rightarrow 504, xDe[9] \rightarrow 9, yDe[9] \rightarrow 492, xDe[10] \rightarrow 10, yDe[10] \rightarrow 461, xDe[11] \rightarrow 11, yDe[11] \rightarrow 413, xDe[12] \rightarrow 12, yDe[12] \rightarrow 378, xDe[13] \rightarrow 13, yDe[13] \rightarrow 323, xDe[14] \rightarrow 14, yDe[14] \rightarrow 212, xDe[15] \rightarrow 15, yDe[15] \rightarrow 173, xDe[16] \rightarrow 16, yDe[16] \rightarrow 163, xDe[17] \rightarrow 17, yDe[17] \rightarrow 130, xDe[18] \rightarrow 18, yDe[18] \rightarrow 126, xDe[19] \rightarrow 19, yDe[19] \rightarrow 117, xDe[20] \rightarrow 20, yDe[20] \rightarrow 109, xDe[21] \rightarrow 21, yDe[21] \rightarrow 84, xDe[22] \rightarrow 22, yDe[22] \rightarrow 56, xDe[23] \rightarrow 23, yDe[23] \rightarrow 52, xDe[24] \rightarrow 24, yDe[24] \rightarrow 40, xDe[25] \rightarrow 25, yDe[25] \rightarrow 36, xDe[26] \rightarrow 26, yDe[26] \rightarrow 34, xDe[27] \rightarrow 27, yDe[27] \rightarrow 31, xDe[28] \rightarrow 28, yDe[28] \rightarrow 2, xDe[29] \rightarrow 29, yDe[29] \rightarrow 1, FDex \rightarrow 15.00000000000158, FDey \rightarrow 173.0000000000128, pDe \rightarrow 378.83027902117794, xfry[1] \rightarrow 1, yfry[1] \rightarrow 1461, xfry[2] \rightarrow 2, yfry[2] \rightarrow 1105, xfry[3] \rightarrow 3, yfry[3] \rightarrow 736, xfry[4] \rightarrow 4, yfry[4] \rightarrow 651, xfry[5] \rightarrow 5, yfry[5] \rightarrow 639, xfry[6] \rightarrow 6, yfry[6] \rightarrow 632, xfry[7] \rightarrow 7, yfry[7] \rightarrow 528, xfry[8] \rightarrow 8, yfry[8] \rightarrow 454, xfry[9] \rightarrow 9, yfry[9] \rightarrow 390, xfry[10] \rightarrow 10, yfry[10] \rightarrow 387, xfry[11] \rightarrow 11, yfry[11] \rightarrow 348, xfry[12] \rightarrow 12, yfry[12] \rightarrow 309, xfry[13] \rightarrow 13, yfry[13] \rightarrow 288, xfry[14] \rightarrow 14, yfry[14] \rightarrow 236, xfry[15] \rightarrow 15, yfry[15] \rightarrow 228, xfry[16] \rightarrow 16, yfry[16] \rightarrow 224, xfry[17] \rightarrow 17, yfry[17] \rightarrow 159, xfry[18] \rightarrow 18, yfry[18] \rightarrow 154, xfry[19] \rightarrow 19, yfry[19] \rightarrow 145, xfry[20] \rightarrow 20, yfry[20] \rightarrow 136, xfry[21] \rightarrow 21, yfry[21] \rightarrow 131, xfry[22] \rightarrow 22, yfry[22] \rightarrow 104, xfry[23] \rightarrow 23, yfry[23] \rightarrow 71, xfry[24] \rightarrow 24, yfry[24] \rightarrow 61, xfry[25] \rightarrow 25, yfry[25] \rightarrow 36, xfry[26] \rightarrow 26, yfry[26] \rightarrow 33, xfry[27] \rightarrow 27, yfry[27] \rightarrow 29, xfry[28] \rightarrow 28, yfry[28] \rightarrow 21, xfry[29] \rightarrow 29, yfry[29] \rightarrow 18, xfry[30] \rightarrow 30, yfry[30] \rightarrow 10, xfry[31] \rightarrow 31, yfry[31] \rightarrow 5, xfry[32] \rightarrow 32, yfry[32] \rightarrow 2, xfry[33] \rightarrow 33, yfry[33] \rightarrow 2, xfry[34] \rightarrow 34, yfry[34] \rightarrow 1, xfry[35] \rightarrow 35, yfry[35] \rightarrow 1, Ffryx \rightarrow 17.999999999999993, Ffryy \rightarrow 154., pfry \rightarrow 327.09812272488006 \} \} - 1], \{fi, psi\}]$$

and we get: $\text{Rex}[\text{De,fry}] \{0.0086215, \{fi 0.477283, psi 0.483977\}\}$.

i.e. the distance between German and Frisian text of “Human Rights” is equal to 0.0086215 with angles of rotations $\varphi = 0.477283$ and $\psi = 0.483977$.

In similar way in [4] we get the distance between:

Frisian and Dutch: $\text{Rex}[\text{Fry}, \text{NI}] \rightarrow \{0.00989766, \{fi \rightarrow 0.355909, psi \rightarrow 0.329401\}\}$;
 English and Frisian: $\text{Rex}[\text{GB}, \text{fry}] \rightarrow \{0.0133242, \{fi \rightarrow 0.499621, psi \rightarrow 0.509012\}\}$;
 German and English: $\text{Rex}[\text{De}, \text{GB}] \rightarrow \{0.0159066, \{fi \rightarrow 0.585008, psi \rightarrow 0.583676\}\}$;
 German and Dutch: $\text{Rex}[\text{De}, \text{NI}] \rightarrow \{0.0161782, \{fi \rightarrow 0.444233, psi \rightarrow 0.430987\}\}$;
 Afrikaans and Dutch: $\text{Rex}[\text{Afr}, \text{NI}] \rightarrow \{0.0190324, \{fi \rightarrow 0.478443, psi \rightarrow 0.481322\}\}$;
 Frisian and Afrikaans: $\text{Rex}[\text{Fry}, \text{Afr}] \rightarrow \{0.0265862, \{fi \rightarrow 0.471716, psi \rightarrow 0.446935\}\}$;
 English and Dutch: $\text{Rex}[\text{GB}, \text{NI}] \rightarrow \{0.0282393, \{fi \rightarrow 0.523854, psi \rightarrow 0.516264\}\}$;
 English and Afrikaans: $\text{Rex}[\text{GB}, \text{Afr}] \rightarrow \{0.0361154, \{fi \rightarrow 0.488544, psi \rightarrow 0.48138\}\}$;
 German and Afrikaans: $\text{Rex}[\text{De}, \text{Afr}] \rightarrow \{0.0453406, \{fi \rightarrow 0.514139, psi \rightarrow 0.503535\}\}$.
 Those data are visible in the symbolic diagram (Figure 1).

2.2. North German Languages

The letter data (rang-letter-frequency) for the texts of this group of languages are:

In the Danish text “**VERDENSERKLÆRINGEN OM MENNESKERETTIGHEDERNE**”

Dk{1493,826,697,611,607,597,534,502,473,443,393,278,245,237,224,195,115,103,86,80,71,58,52,34,15}

In the Icelandic text “**Mannréttindayfirlýsing Sameinuðu þjóðanna**”:

Ic{803,729,633,621,508,494,476,415,384,381,306,296,231,201,168,154,128,126,113,104,104,93,93,80,74,74,60,53,49,22,17}

In Føroyskt (Faroese) text “**HEIMSYVIRLÝSING UM MANNARÆTTINDI**”:

Fa{835,708,679,564,555,511,398,391,380,356,335,301,221,185,183,173,165,159,147,115,108,82,78,64,58,41,35,25,11}

In Norwegian bokmol text “**VERDENSERKLÆRINGEN OM MENNESKERETTIGHETENE**”:

Nb{1372,762,718,690,567,561,478,463,391,376,308,298,234,213,208,204,102,101,100,80,51,49,46,22}

In Norwegian nynorsk text “**DEN INTERNASJONALE FRÅSEGNA OM MENNESKERETTANE**”:

Nn{1161,660,656,653,622,600,519,438,386,370,336,320,248,184,173,165,105,103,98,85,65,63,49,11}

In the Swedish (Svenska) text “**Allmän förklaring om de mänskliga rättigheterna Ingress**”:

Sv{878,875,807,797,760,659,575,514,366,341,311,303,258,245,240,218,191,156,119,112,97,94,80,45,39,1}

As before, we get the distance between (Figure 2):

Norwegian and Swedish – $\text{Rex}[\text{No}, \text{Sv}] \rightarrow \{0.00710435, \{fi \rightarrow 0.4599, psi \rightarrow 0.448084\}\}$;
 Norwegian and Icelandic – $\text{Rex}[\text{No}, \text{Ic}] \rightarrow \{0.00762928, \{fi \rightarrow 0.479103, psi \rightarrow 0.485782\}\}$;
 Danish and Norwegian – $\text{Rex}[\text{Dk}, \text{No}] \rightarrow \{0.00864969, \{fi \rightarrow 0.557609, psi \rightarrow 0.576521\}\}$;
 Swedish and Icelandic – $\text{Rex}[\text{Sv}, \text{Ic}] \rightarrow \{0.0130824, \{fi \rightarrow 0.547709, psi \rightarrow 0.563627\}\}$;
 Danish and Swedish – $\text{Rex}[\text{Dk}, \text{Sv}] \rightarrow \{0.0162672, \{fi \rightarrow 0.451468, psi \rightarrow 0.452169\}\}$;
 Danish and Icelandic – $\text{Rex}[\text{Dk}, \text{Ic}] \rightarrow \{0.019497, \{fi \rightarrow 0.625088, psi \rightarrow 0.647884\}\}$.

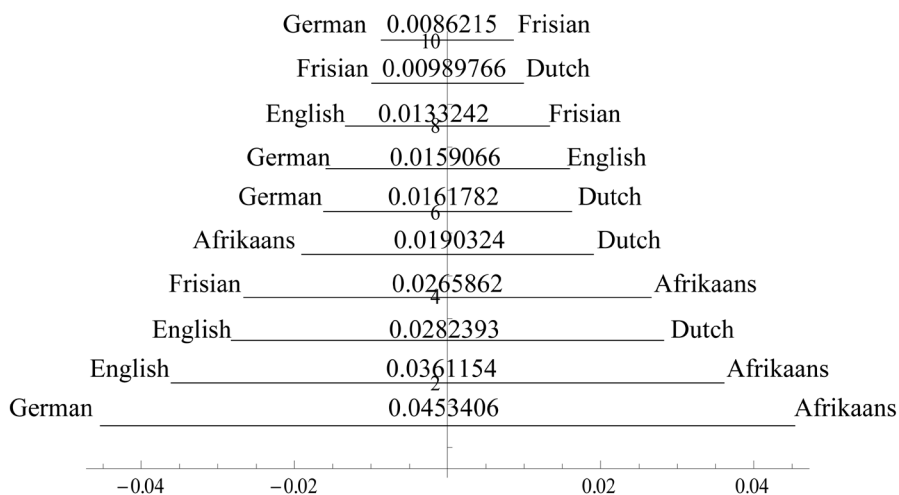

Figure 1. The distances between 10 pairs of West German languages in increasing order (top-down).

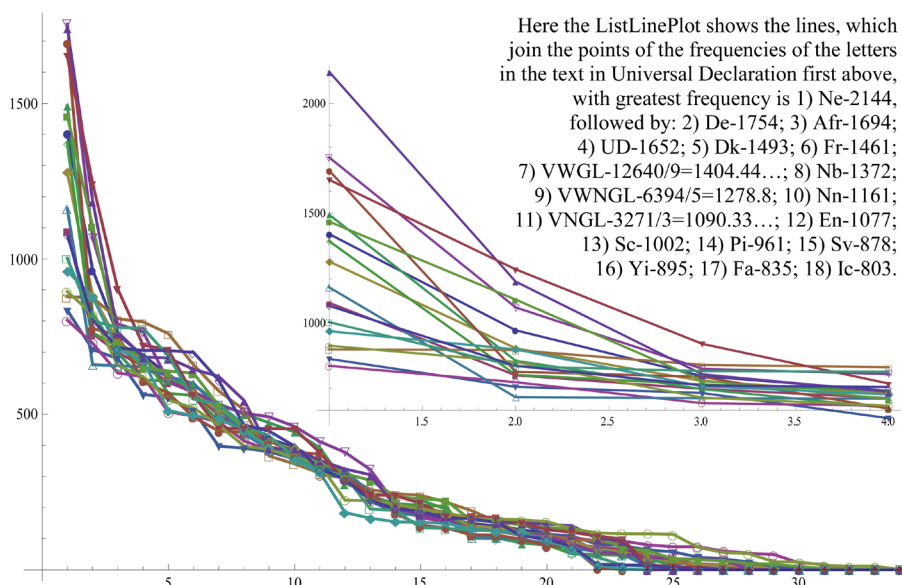

Figure 3. The ListLinePlot of the frequencies of the letters in the text of Universal Declaration of all 15 German languages and 3 Virtual German languages for the 35 frequencies (left) and for the first 4 frequencies (right).

Table 1. The distances between all 15 languages of the German group having the text of Universal Declaration and the Virtual WGL (left), NGL (in middle) and WNGL (right) (top-down).
