

Special Issue on New Technologies in Naval Transportations and Logistics

Call for Papers

The sea is where life is said to have originated. Not only do the earth's oceans provide vital routes of transportation and a rich source of raw materials; they have also remained a challenging frontier and an essential natural habitat whose preservation will be crucial to human survival in the twenty-first century. The efforts of marine scientists and technologists are aimed at the advancement of scientific and engineering knowledge regarding the sea. The Special Issue “New Technologies in Naval Transportations and Logistics” will publish papers that explore developments in marine engineering and marine technology for practitioners and researchers, considering topical issues from environmental impacts, energy transition and performance through to autonomy and artificial intelligence. In addition, research papers in the area of marine engineering, dynamic positioning and remote sensing, remotely operated underwater vehicles, naval information technology are welcome for submission. The range of topics covered in the Special Issue “New Technologies in Naval Transportations and Logistics”, extends in the field of offshore structures, supply chain and logistics in high-tech harbors and modern methods for transportations’ tracking.

In this special issue, potential topics include, but are not limited to:

- Marine Engineering and AI Applications
- Underwater Technology and Engineering
- Sea Surface and Sub-Surface Support
- Autonomous Navigation
- Protection of the Marine Environment
- (renewable and non-renewable) Marine Resources
- Fleet Management
- Hydrodynamics
- Vessel Dynamic Positioning
- Naval Remote Sensing
- Transport Logistics and Economics
- Warehouse Management and ERP systems
- Internal Quality Audits
- Just In Time (JIT) methods

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – *New Technologies in Naval Transportations and Logistics***” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 1st, 2021
Publication Date	June 2021

Guest Editor:

Prof. Michail Papoutsidakis, University of West Attica, Greece
