Special Issue on Electronic Information Engineering

Call for Papers

Electronic and information engineering is a discipline using computers and other modern technology to go on information control and information processing, mainly research information acquisition and processing, and design, development, application and integration of electronic equipment and information systems. Electronic information engineering has covered many aspects of the society. Electronic information engineering is a program with a collection of modern electronic technology, information technology, communication technology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Electronic Information Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Electronic Information Engineering**. In this special issue, potential topics include, but are not limited to:

- Electronic materials
- Electrical systems
- Integrated electronics
- Electronic devices and circuits
- Basic electronics and microprocessors
- Solid state devices
- Digital and analog communication
- Analog integrated circuits
- Satellite communication
- Communication technology

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue - *Electronic Information Engineering***" should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 25th 2022
Publication Date	October 2022
