

## Special Issue on Industrial Engineering

### Call for Papers

The theme of Industrial Engineering revolves around the optimization and improvement of systems, processes, and resources in various industries. It is a multidisciplinary field that combines engineering principles, mathematics, and scientific methods to enhance efficiency, productivity, and quality in industrial and manufacturing environments. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Industrial Engineering**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Industrial Engineering**. In this special issue, potential topics include, but are not limited to:

- Manufacturing, distribution, transportation, mercantile, and service
- Production planning and control
- Quality control; inventory, equipment
- Physical, financial, economic, and human components
- Manufacturing systems engineering
- The production management
- Manufacturing systems
- Ergonomics and human factors engineering
- Supply chain management
- Product and process design
- Industrial data analytics
- Operations research

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Industrial Engineering**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 8th 2024
Publication Date	May 2024

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Open Journal of Applied  
Sciences**  
ISSN Online:2165-3925
