

Special Issue on Computing and Artificial Intelligence

Call for Papers

Artificial intelligence (AI) is a field of computer science that aims to mimic human thought processes, learning capacity, and knowledge storage. AI techniques have been applied in cardiovascular medicine to explore novel genotypes and phenotypes in existing diseases, improve the quality of patient care, enable cost-effectiveness, and reduce readmission and mortality rates. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Computing and Artificial Intelligence**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Computing and Artificial Intelligence**. In this special issue, potential topics include, but are not limited to:

- Machine learning
- Multiagent technology
- Database, information systems and security
- Multi-agent systems and pervasive computing
- Natural language processing
- Planning and scheduling
- Security, information retrieval and database systems
- IT innovations, optimization and algorithm
- Computer science and artificial intelligence
- Advances in theory, practice, and case-study of emerging computer technology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Computing and Artificial Intelligence**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 26th 2024
Publication Date	August 2024

Guest Editor:

Scientific Research
Open Access

**Open Journal of Applied
Sciences**

ISSN Online:2165-3925
