

## Special Issue on Research on Various Mental Illnesses

### Call for Papers

Research on various mental illnesses represents a multifaceted and intricate field of study that delves into the etiology, diagnosis, and treatment of diverse psychological disorders. This area of research encompasses a broad range of topics, from understanding the neurobiological mechanisms underlying mental illnesses to exploring the psychological and social factors that contribute to their development and manifestation. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Research on Various Mental Illnesses**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Research on Various Mental Illnesses**. In this special issue, potential topics include, but are not limited to:

- Etiology and Pathogenesis
- Diagnosis and Assessment
- Psychopathology
- Neurobiology of Mental Illnesses
- Psychopharmacology
- Psychotherapy and Intervention Research
- Epidemiology and Prevention
- Cultural and Social Aspects of Mental Illnesses

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Research on Various Mental Illnesses**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 27th 2024
Publication Date	September 2024
