

Special Issue on Robotics and Automation

Call for Papers

Robotics and Automation research is a dynamic and interdisciplinary field that focuses on the development, design, and application of robots and automated systems. This research aims to enhance human capabilities, improve productivity, and automate tasks that are tedious, dangerous, or require precision. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Robotics and Automation**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Robotics and Automation**. In this special issue, potential topics include, but are not limited to:

- Mobile Robotics
- Robot Manipulation
- Industrial Robotics
- Service Robotics
- Control Systems
- Optimization and Decision Making
- Artificial Intelligence and Machine Learning
- Integration and Coordination
- Cloud Robotics
- Challenges and Opportunities

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Robotics and Automation**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	September 20th, 2024
Publication Date	November 2024
