

## Special Issue on Research on Antibiotics

### Call for Papers

Research on antibiotics involves a comprehensive approach that spans from basic science to clinical trials and includes disciplines such as biochemistry, microbiology, pharmacology, medicinal chemistry, and clinical research. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Research on Antibiotics**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Research on Antibiotics**. In this special issue, potential topics include, but are not limited to:

- Biochemistry and Molecular Biology of Antibiotics
- Microbiology and Antibiotic Resistance
- Medicinal Chemistry and Drug Discovery
- Pharmacology and Clinical Trials
- Alternative Strategies for Infection Control
- Pharmacology and Pharmacokinetics
- Microbiology and Microbial Ecology
- Genomics and Metagenomics of Antibiotic Resistance
- Immunological Approaches to Antibiotic Therapy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Research on Antibiotics**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 25th 2025
Publication Date	Marh 2025
