## Special Issue on Economics of Innovation

### Call for Papers

Innovation is an essential driver of economic progress that benefits consumers, businesses and the economy as a whole. In economic terms, innovation describes the development and application of ideas and technologies that improve goods and services or make their production more efficient.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Economics of Innovation**. Potential topics include, but are not limited to:

- Economic models of innovation
- Economics of innovation and policy
- Economics of innovative change
- Economics of innovation and new technology
- Economics and management of innovation
- innovation and sustainability
- Innovation and public policy
- innovation, entrepreneurship and competition
- Innovation, economics and strategy
- Structural change and economic development
- Marketing innovation
- Consumer-driven innovation
- Public innovation policy
- Innovation, R&D and firm performance
- Innovation and trade
- Intellectual property
- Innovation, productivity and growth
- High-tech industry agglomeration

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Economics of Innovation**” should be chosen during your submission.
