

Special Issue on Rehabilitation Medicine

Call for Papers

This special issue welcomes research and review papers on important trends and developments in rehabilitation and related fields. Topics include prevention, diagnosis, treatment, and rehabilitation of musculoskeletal conditions, brain injury, spinal cord injury, cardiopulmonary disease, trauma, acute and chronic pain, amputation, prosthetics and orthotics, mobility, gait, and pediatrics as well as areas related to education and administration. Other important areas of interest include cancer rehabilitation, aging, and exercise.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Rehabilitation Medicine**. Potential topics include, but are not limited to:

- Cancer rehabilitation
- Cardiopulmonary rehabilitation
- Cardiovascular disability
- Geriatric rehabilitation
- Hospice and palliative medication
- Inpatient rehabilitation
- Interventional pain
- Mental rehabilitation
- Musculoskeletal pain management
- Neuromuscular medicine
- Orthopedic rehabilitation
- Pediatric rehabilitation
- Physical medicine and rehabilitation
- Rehabilitation nursing and services
- Rehabilitation therapy
- Spinal cord injury medicine
- Surgical rehabilitation
- Traumatic brain injuries

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Rehabilitation Medicine***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 6th, 2016
Publication Date	March 2017
