## Special Issue on Civil and Environmental Engineering

### Call for Papers

**Civil and environmental engineering** studies infrastructures providing environmental living systems, concerning issues about clean water, clean air, safe buildings, protection, energy transport, , waste disposal, defense to earthquakes, flood, drought, and landslides.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **civil and environmental engineering**. Potential topics include, but are not limited to:

- Environmental infrastructures
- Sustainable construction
- Soil–structure interaction
- Seismic performance of buildings
- Built environment
- Environmental highway construction
- Energy efficiency in buildings
- Wind loading of buildings

Authors should read over the journal’s [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Civil and Environmental Engineering**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 22nd, 2018
Publication Date	April 2018
