

Special Issue on Green Building and Sustainability

Call for Papers

Green building refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle. It is a practice of reducing the environmental impact of buildings and enhancing the health and wellbeing of building. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of cement and concrete.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Green Building and Sustainability**. Potential topics include, but are not limited to:

- Building engineering
- Ecological architecture
- Environmental improvement plans
- Green architecture
- Green neighborhoods and villages
- Healthy building
- Life cycle assessment
- Low-energy building
- Sustainable design
- Sustainable urban planning

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Green Building and Sustainability**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 31st, 2022
Publication Date	December 2022

Guest Editor:

Scientific Research
Open Access

Open Journal of Civil Engineering

ISSN Online: 2164-3172
