**Special Issue on**  
**Built Environment and Construction Management**  
**Call for Papers**

Construction is the creation of the built environment, which is everything around us that is human-made such as houses, roads, bridges, sports stadiums and airports. The purpose of constructing buildings is to provide ideal venues where people can host social, economic, political, and cultural activities. Through the evaluation of the built environment, not only can the quality of the built environment be judged, but also the level of the built environment quality can be further understood. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Built Environment and Construction Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Built Environment and Construction Management**. Potential topics include, but are not limited to:

- Building regulations and control in construction
- Built environment and sustainability
- Built environment evaluation
- Construction design
- Construction project management
- Construction technology
- Health & safety in construction
- Land and natural resources
- Landscape design and land use
- Public spaces and community establishment
- Site engineering for construction
- Sustainable materials management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Built Environment and Construction Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 31st, 2023
Publication Date	March 2023
