

Special Issue on Hypothalamic and Pituitary Diseases

Call for Papers

Hypothalamus-pituitary system has a critical role in regulating homeostatic systems and maintaining the neuroendocrine function in the body. Due to the complexity of hypothalamus-pituitary system regulation, the clinical manifestations of hypothalamus-pituitary lesions are diverse. Hypothalamic and pituitary diseases mainly include pituitary tumors, gigantism, acromegaly, dwarfism, hypopituitarism, diabetes insipidus, syndrome of inappropriate antidiuretic hormone, and so forth.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **hypothalamic and pituitary diseases**. Potential topics include, but are not limited to:

- Diagnosis of hypothalamic and pituitary diseases
- Treatments of hypothalamic and pituitary diseases
- Hypopituitarism
- Diabetes insipidus
- Pituitary tumors
- Developmental disorders

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Hypothalamic and Pituitary Diseases**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	January 16th, 2018
Publication Date	March 2018
