**Special Issue on**  
**Seismo Electromagnetics and Earthquake Prediction**

**Call for Papers**

Earthquake (EQ) prediction is still very essential for the mitigation of the loss of human lives and economical losses. The research during the last few decades yielded that non-seismological phenomena, mainly electromagnetic (+geochemical) effects do take place prior to an EQ, and those seismo-electromagnetic phenomena are considered to be very promising for short-term EQ prediction. An enormous progress is going on in this field of seismo-electromagnetics, and especially the mechanism of lithosphere-atmosphere- ionosphere coupling is a challenging topic. Further studies will be highly required to discuss the applicability of pre-EQ signals toward EQ prediction. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **seismo electromagnetics and earthquake prediction**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **seismo electromagnetics and earthquake prediction**. In this special issue, potential topics include, but are not limited to:

- General discussion on EQ preparation process and the physics of pre-EQ signals
- Statistical analyses of EQ precursors
- Theory, modeling, laboratory experiments, computational simulation for generation and propagation of pre-EQ signals and their connection with seismic cycle
- Multi-parameter observations, detection, and validation of pre-EQ signals
- The latest developments in EQ predictability and prospective testing associated with major EQs
- Other related topics on EQ preparation processes and EQ prediction

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Seismo Electromagnetics and Earthquake Prediction**” should be selected during your submission.

Special Issue timetable:

Scientific Research  
*Open Access*

Open Journal of  
Earthquake Research  
ISSN Online: 2169-9631

---

Submission Deadline	December 30th, 2019
Publication Date	January 2020

**Guest Editor:**

Prof. Masashi Hayakawa

Hayakawa Institute of Seismo Electromagnetics Co., Ltd., Japan
