Special Issue on
Earthquake Engineering and Structural Dynamics

Call for Papers

Earthquake engineering is an interdisciplinary branch of engineering that focuses on the description of earthquake sources, characterization of site effects and structural response, and description of measures of seismic protection. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Earthquake Engineering and Structural Dynamics.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Earthquake Engineering and Structural Dynamics. Potential topics include, but are not limited to:

- Seismic design
- Seismic loading
- Seismic performance assessment
- Seismic hazard assessment
- Seismic risk
- Seismic vibration control
- Seismic regions
- Earthquake prediction
- Earthquake and civil infrastructure
- Earthquake-resistant construction

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Earthquake Engineering and Structural Dynamics” should be selected during your submission.

Special Issue Timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 30th, 2021</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February 2022</td>
</tr>
</tbody>
