

Special Issue on Ecology, Environment and Management

Call for Papers

Ecological environment, is an abbreviation for an environment composed of ecological relationships. Ecological environment refers to the collective name of the quantity and quality of water resources, land resources, biological resources, and climatic resources that affect the survival and development of human beings. It is a complex ecological system related to the sustainable development of society and economy. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Ecology, Environment and Management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Ecology, Environment and Management**. Potential topics include, but are not limited to:

- Wetland ecology principles and conservation
- Ecology and evolution
- Ecology conservation and management
- Forest exploitation and utilization
- Plant ecology & animal ecology
- Landscape ecology
- Restoration and management
- Ecosystem ecology
- Ecology model
- Ecology species diversity

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Ecology, Environment and Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 29th, 2020
Publication Date	July 2020
