

## Special Issue on Nature Ecology and Evolution

### Call for Papers

Ecology is a broad and diverse field of study that focus on the relationships between living organisms, including humans, and their physical environment; it seeks to develop our understanding of organisms and their diversity, interactions between them, and the natural environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Nature Ecology and Evolution.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Nature Ecology and Evolution**. Potential topics include, but are not limited to:

- Antagonistic pleiotropy
- Biological diversity
- Evolutionary adaptation
- Gene repertoire evolution
- Macroevolutionary patterns
- Metazoan phylogeny
- Microbial evolution
- Palaeoecology
- Phylogenetic analysis
- Speciation analysis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Nature Ecology and Evolution**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 28th, 2021
Publication Date	November 2021

**Guest Editor:**
