

Special Issue on Ecosystem Management and Sustainability

Call for Papers

Ecosystem management and sustainability is a field of study and practice that focuses on the protection, conservation, and sustainable use of ecosystems. It involves managing and maintaining the health and functioning of ecosystems while considering the well-being of both human communities and the environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Ecosystem Management and Sustainability.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Ecosystem Management and Sustainability**. Potential topics include, but are not limited to:

- Biosphere reserves
- Carbon footprint
- Climate change adaptation
- Disaster risk reduction
- Diverse and healthy ecosystems
- Ecological balance
- Ecological management
- Ecosystem and biodiversity
- Ecosystem conservation and restoration
- Ecosystem monitoring and assessment
- Ecosystem resilience
- Ecosystem services
- Green infrastructure
- Human health and ecosystem management
- Impact mitigation and ecological compensation
- Natural resource management
- Renewable energy
- Sustainable practices
- Wildlife conservation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Ecosystem Management and Sustainability***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 8th, 2024
Publication Date	July 2024
