

Special Issue on Species Diversity and Habitat Conservation

Call for Papers

Species diversity is the number of different species that are represented in a specific ecological community. Habitat conservation is a management practice that seeks to conserve, protect and restore habitats and prevent species extinction, fragmentation or reduction in range. It ensures the long-term survival of life on the planet and allows species to thrive in their environments. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Species Diversity and Habitat Conservation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Species Diversity and Habitat Conservation**. Potential topics include, but are not limited to:

- Community ecology
- Ecological diversity
- Ecological extinction
- Ecosystem health
- Endemic species
- Genetic diversity
- Invasive species
- Species distribution
- Species richness
- Floodplain
- Mountains
- Wetlands
- Deserts
- Grasslands
- Polar regions
- Ocean habitat
- Forest habitat
- Freshwater habitat
- Tropical rainforests

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Species Diversity and Habitat Conservation***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 18th, 2024
Publication Date	August 2024
