

Special Issue on
Environmental Ecology and Ecological Effectiveness
Call for Papers

Environmental ecology studies the environmental systems and the interactions among organisms (such as plants, animals, microorganisms, etc.) and the ecotope around them. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Environmental Ecology and Ecological Effectiveness.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Environmental Ecology and Ecological Effectiveness**. Potential topics include, but are not limited to:

- Biosphere reserve
- Conservation biology
- Ecological effectiveness of protected areas
- Ecological environment issues
- Ecological modelling
- Ecological modernization
- Ecological restoration
- Economic efficiency and environmental effectiveness
- Environment planning, design and assessment
- Industrial ecology
- Social-ecological systems
- Technological change and the environment
- The ecological effects of pollution, disturbance, and other stresses
- Wildlife conservation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environmental Ecology and Ecological Effectiveness**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 28th, 2024
Publication Date	August 2024
