

Special Issue on Future Forests and Sustainability

Call for Papers

The demand for use of forests is increasing and wood markets are becoming increasingly globalized. Thus, the consequences of the management of forest resources need to be analyzed both nationally and from a global perspective. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **future forests and sustainability**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **future forests and sustainability**. In this special issue, potential topics include, but are not limited to:

- Natural forest resources protection
- Forest ecological function
- Forest development planning
- Exotic and invasive plant species impacting forests
- Forest loss and management
- Sustainable forest management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Future Forests and Sustainability**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 20th, 2020
Publication Date	October 2020
