

Special Issue on Forest Ecology and Management

Call for Paper

Forestry is the science and art of attaining desired forest conditions and benefits. Forest ecosystems supply our water, maintain our climate, help purify the air, protect soils, provide for recreational experiences, and serve as habitat for wildlife and preserves of biological diversity. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Forest Ecology and Management**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Forest Ecology and Management**. In this special issue, potential topics include, but are not limited to:

- Carbon sequestration
- Use of forest biomass for bioenergy
- The role of forests in carbon cycles, sequestration, and storage
- Carbon storage analysis
- Forests and the global carbon cycle
- Forest carbon sequestration effect monitoring
- Nutrient cycling process in forest ecosystem
- Forest hydrological process
- Forest energy process
- Diversity of forest

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Forest Ecology and Management**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 29th, 2022
Publication Date	May 2022
