

Special Issue on
Geotechnical and Geological Engineering
Call for Papers

Geotechnical and Geological Engineering focuses on the study of soil and rock engineering, and of geology as applied in the civil engineering, mining and petroleum industries, environmental engineering, and hydrology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Geotechnical and Geological Engineering.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geotechnical and Geological Engineering**. Potential topics include, but are not limited to:

- Earthquake engineering
- Foundation engineering
- Offshore geotechnical engineering
- Geophysical exploration
- Geodetic technology
- Geo-environmental engineering
- Geohazards and mitigation
- Geotechnical construction techniques
- Geotechnical design and rockslope analysis
- Geotextiles, geogrids and geosynthetics
- Ground control and mine design
- Mining engineering
- Petroleum engineering
- Slope stability analysis
- Soil and rock engineering

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Geotechnical and Geological Engineering**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	September 28th, 2022
Publication Date	November 2022
