Special Issue on Pancreatitis and Liver Disease

Call for Papers

Liver disease is a general term for all diseases that occur in the liver. The causes of liver diseases include virus, bacteria, parasite infection, improper diet, drinking, stone and other diseases involving the liver. The common clinical manifestations of liver disease are liver injury, liver infectious disease, liver cancer, liver benign tumor, etc. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Pancreatitis and Liver Disease.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Pancreatitis and Liver Disease. Potential topics include, but are not limited to:

- Pancreatic disorder & therapy
- Acute pancreatitis
- Chronic pancreatitis
- Liver damage
- Liver cancer and hepatitis
- Pancreatic cancer
- Hepatitis B and Hepatitis C
- Symptoms, causes and treatment

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Pancreatitis and Liver Disease” should be selected during your submission.
