

Special Issue on Applied Genetics

Call for Papers

Applied Genetics studies the applicative aspects of plant, human, animal and microbial genetics and genomics. The genetic techniques can help improve the quality of food and agricultural products, diagnose and treat inherited disorders of all living beings, as well as be used for animal and plant breeding. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Applied Genetics.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Applied Genetics**. Potential topics include, but are not limited to:

- Gene therapy
- Recombination, mapping and genomics
- Human and medical genetics
- Plant and animal breeding
- Genetic engineering
- Genetic variation
- Applied fungal genetics
- Agricultural products and breeding

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Applied Genetics**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 20th, 2021
Publication Date	December 2021
