
Special Issue on Coastal Resources and Conservation

Call for Papers

The coastal zone, bestowed with sufficient natural resources (both living and non-living), is a potential area for recreation and exploiting non-conventional energy resources (wave and wind energy) and a sound place for people to live along. While the changing climate, the increasing demands from human, the various pollutions, etc., all pose a threat to coastal ecosystems' sustaining growth. The effort to conserve and restore the coastal ecosystems is urgent.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Coastal Resources and Conservation**. Potential topics include, but are not limited to:

- Renewable and non-renewable resources
- Coastal stability
- Energy generation potential
- Impact of human activity on the coast & control measures
- Coastal management strategies
- Estuarine species
- Marine hydrokinetic energy
- Response to sea-level rise
- Offshore wind resource refinement

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Coastal Resources and Conservation**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 29th, 2015
Publication Date	January 2016

Guest Editor:

Scientific Research
Open Access

**Open Journal of
Marine Science**

ISSN Online: 2161-7392
