

Special Issue on Marine Biodiversity

Call for Papers

The oceans of the world encompass 70% of the earth's surface area. Marine biodiversity and ecosystems are essential to the functioning of earth's surface and atmosphere inhabited by living things and thus to the well-being of humans. Ocean and coastal marine ecosystems provide a wide range of goods and services that are rudimentary to human health and welfare. Marine biodiversity sustains the functioning of marine ecosystems and the services that it provides. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **marine Biodiversity**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **marine Biodiversity**. In this special issue, potential topics include, but are not limited to:

- Marine ecosystems
- Marine biodiversity and climate change
- Species diversity
- Genetic diversity
- Ecosystem diversity
- Conservation and management of marine species

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue –Marine Biodiversity**” should be selected during your Submission.

Special Issue timetable:

Submission Deadline	April 30th, 2019
Publication Date	June 2019

Guest Editor:

Prof. Hari M. Srivastava , University of Victoria, Canada
