

Special Issue on Marine Biology

Call for Papers

Marine Biology is a branch of biology that focuses on the study of organisms inhabiting marine environments, including oceans, seas, and other saltwater ecosystems. It encompasses a wide range of sub-disciplines that investigate various aspects of marine creatures and their interactions with the marine environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **Marine Biology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Marine Biology**. In this special issue, potential topics include, but are not limited to:

- Marine algae
- Marine fish
- Marine apvertebra
- Marine population ecology
- Marine physiology
- Marine biology for medicinal purposes
- Marine environmental biology
- Marine habitats
- Marine biotechnology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Marine Biology**” should be selected during your Submission.

Special Issue timetable:

Submission Deadline	December 29th, 2023
Publication Date	February 2024
