

Special Issue on Kidney Disease and Management

Call for Papers

Our kidneys filter extra water and wastes out of the blood and make urine. Kidney disease can affect our body's ability to clean your blood, filter extra water out of our blood, and help control our blood pressure. It can also affect red blood cell production and vitamin D metabolism needed for bone health. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Kidney Disease and Management.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Kidney Disease and Management**. Potential topics include, but are not limited to:

- Chronic kidney disease
- Glomerular diseases
- Kidney cysts
- Kidney failure
- Kidney infections
- Kidney injury
- Kidney stones
- Nephritis
- Nephrotic syndrome
- Pyelonephritis
- Renal artery stenosis
- Renal tubular acidosis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Kidney Disease and Management**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 20th, 2022
Publication Date	December 2022
