

Special Issue on Future Trend in Gynecologic Surgery

Call for Papers

Gynecological surgery refers to surgery performed on the female reproductive system to treat a variety of conditions affecting the female reproductive organs. The main structures of the reproductive system are the vagina, the uterus, the ovaries, and the fallopian tubes. Gynecological surgery is usually performed by gynecologists. It includes procedures for benign conditions, cancer, infertility, and incontinence, and various other conditions. Gynecological surgery may occasionally be performed for elective or cosmetic purposes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Gynecological surgery**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue- Gynecological surgery**" should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 24th, 2012
Publication Date	June 2012
