

Special Issue on Cervical Cancer Diseases

Call for Papers

Cervical Cancer is a malignant neoplasm arising from cells originating in the cervix uteri. One of the most common symptoms of cervical cancer is abnormal vaginal bleeding, but in some cases there may be no obvious symptoms until the cancer has progressed to an advanced stage. Treatment usually consists of surgery (including local excision) in early stages, and chemotherapy and/or radiotherapy in more advanced stages of the disease. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **cervical cancer diseases**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **cervical cancer diseases**. In this special issue, potential topics include, but are not limited to:

- Signs and symptoms
- Treatment of cervical cancer
- Signs and symptoms
- Precancerous lesions
- Cancer subtypes
- Causes of cervical cancer
- Diagnosis of cervical cancer

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Cervical Cancer Diseases**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 3rd, 2014
Publication Date	June 2014
