

## Special Issue on Menstruation and Disease

### Call for Papers

**Menstruation** is a monthly shedding of a female's uterus lining; it lasts about 3 to 5 days (average) and contains blood, cervical mucus and endometrial tissue. It starts at menarche and ceases near menopause. During such long time, premenstrual syndrome, menstrual disorder and dysmenorrheal which tortures numbers of females could predict disease or physiological changes of body. Abnormal menstruation includes disorder of ovulation, cycle length and blood flow which may cause by hormone imbalance, uterine tumor or pregnancy. While dysmenorrheal may arise from endometriosis, uterine fibroids, and uterine adenomyosis. As **menstruation** has close relationship with women' health, it is of great attractions to researchers.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **menstruation and disease**. Potential topics include, but are not limited to:

- Symptom and mechanism of menstruation
- Menstrual disorder
- Dysmenorrheal
- Endometriosis and uterine tumor
- Menstruation and pregnancy
- Treatment of menstrual diseases
- Cases of menstruation and disease

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Menstruation and Disease**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 28th, 2014
Publication Date	October 2014

Scientific Research  
*Open Access*

Open Journal of Obstetrics and  
Gynecology

ISSN Online: 2160-8806
