
Special Issue on Complications of Pregnancy

Call for Papers

Complications of Pregnancy are health problems that are caused by pregnancy. In the immediate postpartum period, 87% to 94% of women report at least one health problem. Long term health problems are reported by 31% of women. Severe complications of pregnancy are present in 1.6% of mothers in the US and in 1.5% of mothers in Canada. The relationship between age and complications of pregnancy are now being researched with greater impetus.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **complications of pregnancy**. Potential topics include, but are not limited to:

- Gestational diabetes
- Pelvic girdle pain
- Deep vein thrombosis
- Peripartum cardiomyopathy
- Hypothyroidism
- Miscarriage
- Ectopic pregnancy
- Placental abruption
- Vertically transmitted infection
- Complications following childbirth
- Incontinence
- Psychological trauma

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Complications of Pregnancy**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 30th, 2018
Publication Date	September 2018
