

Special Issue on Complications of Pregnancy

Call for Papers

Complications of Pregnancy is an academic topic that focuses on different conditions or factors that can arise during pregnancy, potentially impacting the health of the mother and fetus. It involves the study of various medical, physiological, and obstetric complications that can occur throughout the course of pregnancy. This field explores a wide range of pregnancy-related complications, including gestational diabetes, preeclampsia, gestational hypertension, placental abnormalities, fetal growth restriction, preterm labor, and multiple pregnancies (e.g., twins or triplets). It also encompasses conditions that can develop during pregnancy, such as maternal infections, maternal mental health disorders, and maternal medical conditions like hypertension, diabetes, or autoimmune diseases. Research in this area aims to understand the causes, risk factors, mechanisms, and potential interventions for such complications. It explores the impact of these conditions on maternal and fetal health and investigates strategies for prevention, early detection, and management of pregnancy complications. Overall, studying the complications of pregnancy is crucial for advancing medical knowledge, improving maternal and fetal health outcomes, and guiding clinical practices to provide the best possible care for pregnant individuals and their babies.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Complications of Pregnancy**. Potential topics include, but are not limited to:

- Gestational diabetes
- Hypertensive disorders
- Cardiovascular complications
- Eclampsia and preeclampsia
- Placental disorders
- Preterm labor and prematurity
- Multiple pregnancies
- Ectopic pregnancy
- Maternal infections
- Maternal mortality
- Maternal mental health
- Maternal medical conditions
- Fetal growth restriction
- Maternal-fetal immunology
- Interventional and perinatal medicine

-
- Reproductive genetics
 - Postpartum depression

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Complications of Pregnancy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 22nd, 2023
Publication Date	January 2024
