

Special Issue on Arthroplasty and Arthrodesis Call for Papers

Artificial joint replacement refers to the use of metal, high polymer polyethylene, ceramics and other materials, according to the shape, structure and function of human joints to make artificial joint prosthesis, which is implanted into human body through surgical technology to replace the function of sick joints, so as to alleviate joint pain and restore joint function. The main purpose of artificial joint replacement is to relieve joint pain, correct joint deformities, restore joint function, and improve the quality of life of patients. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Arthroplasty and Arthrodesis**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Arthroplasty and Arthrodesis**. Potential topics include, but are not limited to:

- Silicone replacement arthroplasty
- Joint replacement surgery
- Interpositional arthroplasty
- Ligament reconstruction
- Osteotomy
- Mold arthroplasty
- Resection arthroplasty
- Wrist osteoarthritis

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Arthroplasty and Arthrodesis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 15th, 2020
Publication Date	September 2020
