

## Special Issue on Injury, Dislocation and Treatment

### Call for Papers

Dislocation refers to the loss of normal correspondence between the articular surfaces of the joints forming the joints. Dislocation can be divided into traumatic dislocation, congenital dislocation and pathological dislocation. Dislocation usually affects moving joints, such as the ankle, knee, hip, wrist, and elbow, but is most common in the shoulder and finger joints. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Injury, Dislocation and Treatment**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Injury, Dislocation and Treatment**. Potential topics include, but are not limited to:

- Traumatic dislocation, congenital dislocation and pathological dislocation
- Physiotherapy and surgery
- Joint dislocation & hip dislocation
- Dislocation diagnosis
- Knee dislocation
- Shoulder dislocation
- Reduction, repair and reconstruction
- Orthopedic and Trauma
- Arthroscopy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Injury, Dislocation and Treatment**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	May 13th, 2020
Publication Date	July 2020
