

## Special Issue on Challenges and Complications of Orthopedic Surgery

### Call for Papers

Orthopedic surgery has made great progress in the theory and technique of trauma, joint, spine and minimally invasive surgery. Common operations in orthopedic surgery include knee arthroscopy and meniscectomy, shoulder arthroscopy and decompression, removal of support implant and so on. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Challenges and Complications of Orthopedic Surgery**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Challenges and Complications of Orthopedic Surgery**. Potential topics include, but are not limited to:

- Fracture care and trauma
- Arthroscopy
- Joint replacement
- Reconstruction surgery
- Bone injury, healing and grafting
- Complications in orthopedic surgery
- Distraction osteogenesis
- Osteotomy
- Herniated disk surgery

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Challenges and Complications of Orthopedic Surgery**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 21st, 2020
Publication Date	December 2020

**Guest Editor:**

**Scientific Research**  
*Open Access*

**Open Journal of Orthopedics**

**ISSN Online: 2164-3016**
