

Special Issue on Heart Diseases in Infants & Children

Call for Papers

Heart disease is any disorder that affects the heart. There are many types of heart disease: Angina; Arrhythmia; Congenital heart disease; Coronary artery disease (CAD); Dilated cardiomyopathy; Heart attack (myocardial infarction); Heart failure; Hypertrophic cardiomyopathy; Mitral regurgitation; Mitral valve prolapse; and Pulmonary stenosis. Heart diseases in infants and children should be especially treated and taken care of.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Heart Diseases in Infants & Children**. Potential topics include, but are not limited to:

- Symptoms and causes
- Diagnosis and treatment
- Surgery or catheter procedures
- Congenital heart defects
- Critical heart disease
- Pediatric acquired heart disease
- Cardiovascular health and disease in children
- Congenital cardiovascular anomalies
- Aortic stenosis
- Patent ductus arteriosus
- Ventricular septal defect
- Health risk and challenges
- Care and nursing

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Heart Diseases in Infants & Children**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 20th, 2021
Publication Date	July 2021

Scientific Research
Open Access

Open Journal of Pediatrics

ISSN Online: 2160-8776
