

Special Issue on Neonatal Medicine

Call for Papers

Neonatal Medicine is an academic discipline that focuses on the medical care and treatment of newborn infants, particularly those who are born prematurely or with specific health conditions. It involves the study and application of specialized medical interventions, diagnostic techniques, and advanced technologies to ensure the health and well-being of newborns. Neonatal medicine addresses a wide range of issues, including respiratory distress, infections, metabolic disorders, organ immaturity, and developmental delays, seeking to improve outcomes and provide optimal care to newborns in their critical early stages of life.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Neonatal Medicine**. Potential topics include, but are not limited to:

- Prematurity and preterm birth
- NICU practices
- Respiratory disorders in newborns
- Congenital anomalies
- Neonatal immunity
- Cardiology
- Neurology
- Hematology
- Nephrology
- Gastroenterology
- Infectious disease
- Neonatal surgery
- Neonatal imaging
- Mental health and developmental disabilities
- Neurodevelopmental outcomes
- Neonatal genetics
- Feeding and nutrition
- Pharmacology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Neonatal Medicine**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 22nd, 2024
Publication Date	June 2024
